Hi,

We have security limit. We are analysing what kind of numbers you are calling, and will get an answer this Monday, if we can continue the unlimited calls to that destination code.

Kind regards,

Support

Hello

Is "Unlimited Elite" a flat rate for only 21 calls totaling 01h29m03s or did you have not paid your upstream provider for Austria Mobile?

After 2 calls made today, totaling around 32 minutes, I'll get only the error message "Forbidden" as response by making calls to any Austria Mobile number!

With your unconventional interpretation of the SIP standard, nobody is even able to make some test calls or debug any dialplan issues. There is not one day passing, where not new problems are coming up.

best regards

Rudolf Faix
